Election/Restrictions

Applicant's election without traverse of Group I, Claims 1-8 and 10-20 in the reply filed on 11-6-2008 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7, 10, 11, 17 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant claims a "gradient" but fails to claim what type of gradient is being claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 10-21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 55132500, published October 15, 1980. JP 55132500 discloses a pipe system such that when an AC current is supplied from power supply 4 to steel transport pipe 1, transport pipe 1 generates heat by the AC electric characteristics, and the crude oil is heated and thereby the viscosity of the crude oil is lowered. The AC

current which has flowed into outer steel pipe covering 2 through transport pipe 1 causes outer steel pipe covering 2 to generate heat, and thereby transport steel pipe 1 is kept warm.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kurachi, Nelson and Sellers are cited to show structure similar to the claimed invention.
